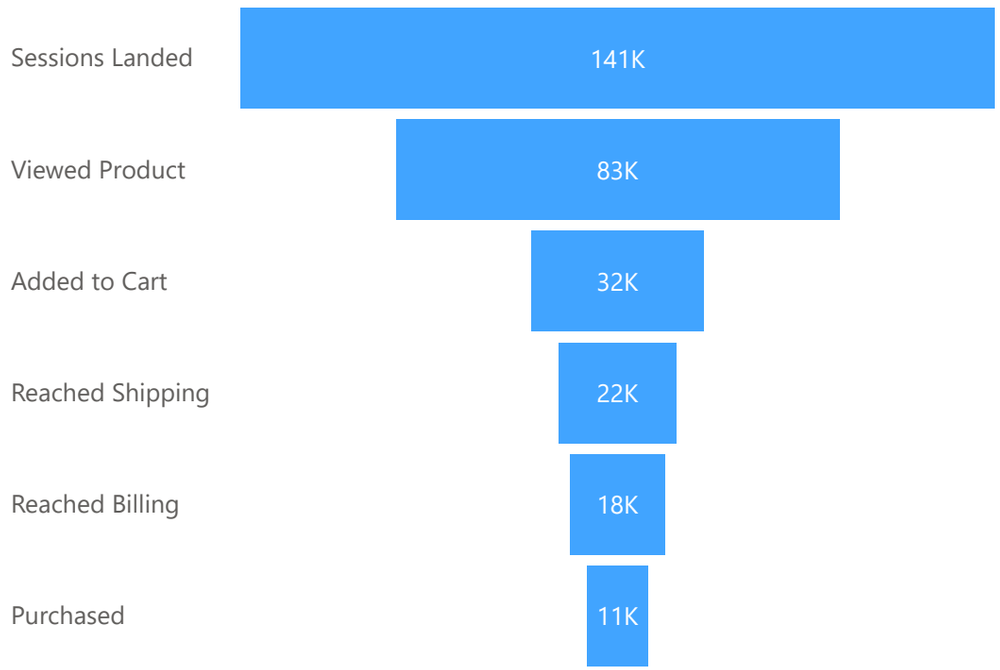
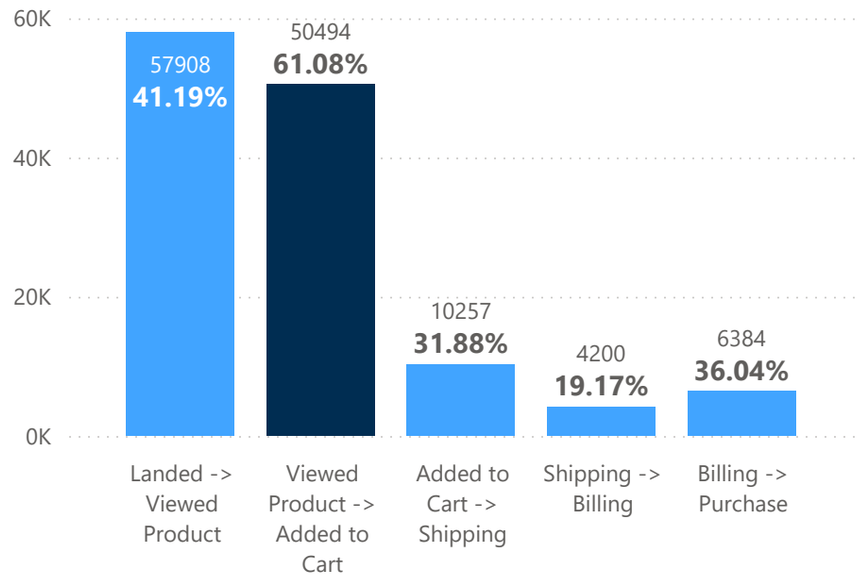
Sales Funnel Performance



Purchase Path Drop-off Summary



The primary conversion bottleneck occurs at the **Viewed Product → Added to Cart** stage, with a significant **61.1% drop-off rate**. While top-of-funnel traffic is healthy at 141K sessions, losing over 50K potential customers at the product interest stage suggests a need to **optimize Product Page engagement** or **review pricing competitiveness** to drive higher intent.

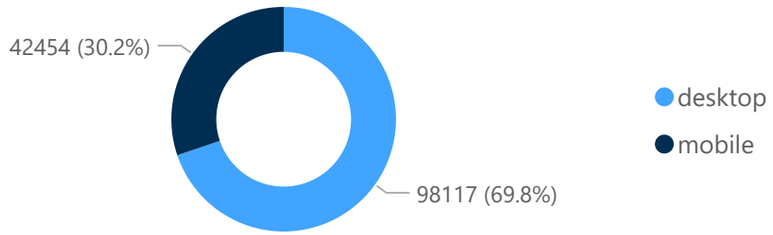
Device Breakdown

$717,267.53	140571	8.06%	$63.32	$4.10
Total Revenue	Sessions Landed	Overall Conversion Rate	Average Order Value	Revenue Per Session

Device Type

- [ ] Select all
- [ ] desktop
- [ ] mobile

Device Traffic Share



While **Mobile** accounts for **30.2%** of total traffic, it suffers from a severe **69.7% drop-off rate** during the **Viewed Product → Add to Cart** transition significantly higher than Desktop's 58.1%. This critical friction point is the primary driver behind Mobile's underperformance, leading to a much **lower 3.45% conversion rate**. **Streamlining the Mobile Product Page UI/UX** is essential to capturing this lost revenue.

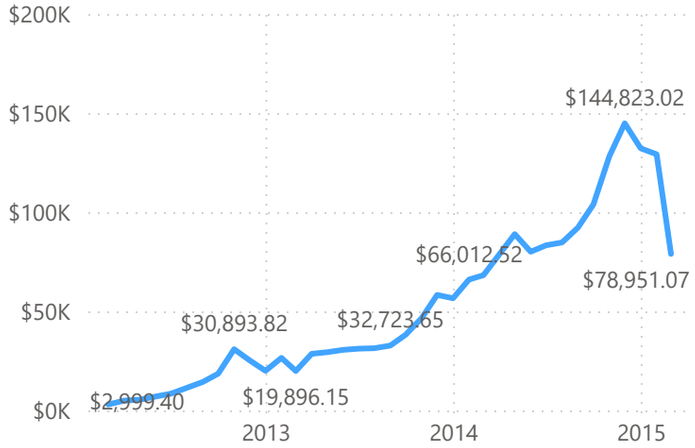
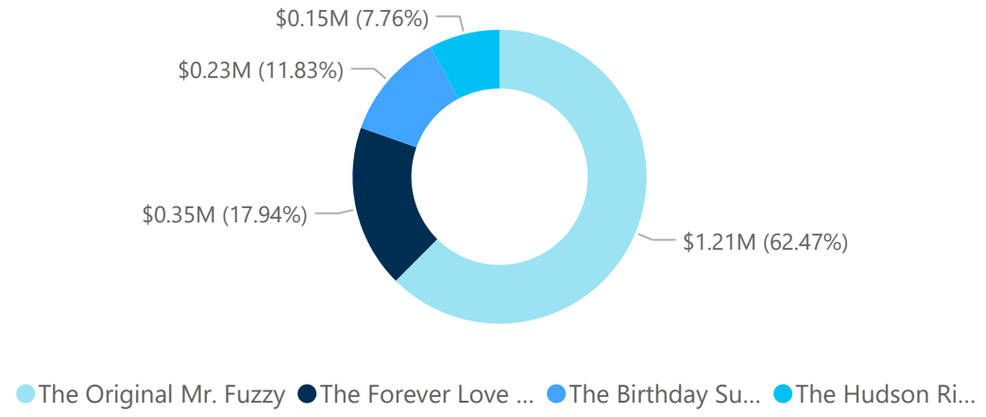
- The Forever Love Bear
- The Hudson River Mini bear
- The Original Mr. Fuzzy

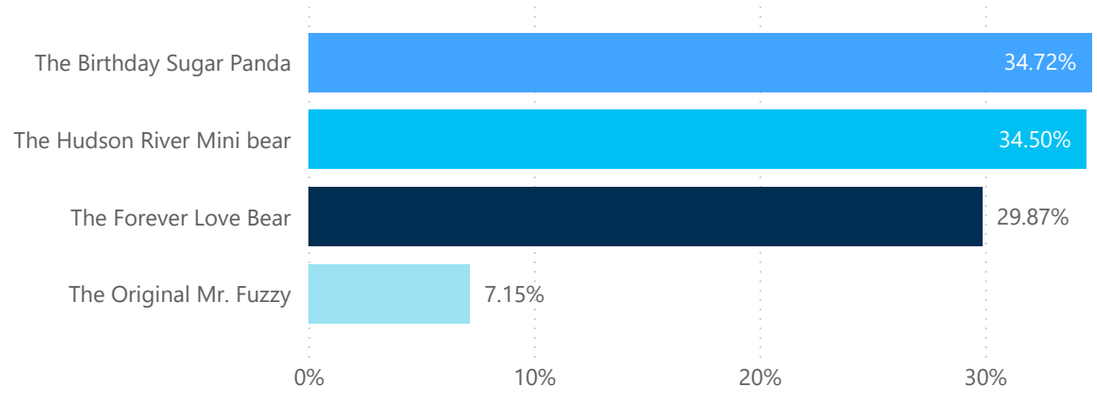
Monthly Revenue Trend by Product



Revenue Share by Product



Refund Rate by Product



The Original Mr. Fuzzy is the most stable product with the lowest refund rate (**7.15%**). In contrast, **The Birthday Sugar Panda** and **The Hudson River Mini Bear** show alarmingly high refund rates exceeding **34%**. While revenue trends are growing, these high-refund products risk damaging long-term margins and customer satisfaction.

Action: Audit quality control for these specific items.
